CML Microcircuits REACH Statement

REACH is the European Community Regulation on chemicals and their safe use (EC 1907/2006). It deals with the Registration, Evaluation, Authorisation and Restriction of Chemical substances. The law entered into force on 1 June 2007.

As CML Microcircuits does not manufacture or import any chemical in excess of 1 tonne per year, CML Microcircuits does not have to register under REACH. Furthermore CML Microcircuits has produced extensive material declarations for the entire range of packages, demonstrating that CML products do not contain any "Substances of Very High Concern" (SVHCs). For information SVHCs are chemicals that are considered to be toxic, carcinogenic, mutagenic, reproductive toxins and harmful to the environment.
